

**Evan Johnson – Center for
Biomedical Informatics and
Artificial Intelligence, Rutgers
Health**

**Najwa Borkadi – Executive
Director, Rutgers Health**

**Eric Garfunkel – Rutgers Global;
Chemistry and Chemical Biology,
and Physics**

The State University of New Jersey

- Internationally recognized, comprehensive public research university
- Renowned faculty and award-winning students
- Contributing to our communities, the nation, and the world through academics, research, clinical care, and collaboration
- Engaged locally, nationally, and globally in service for the common good

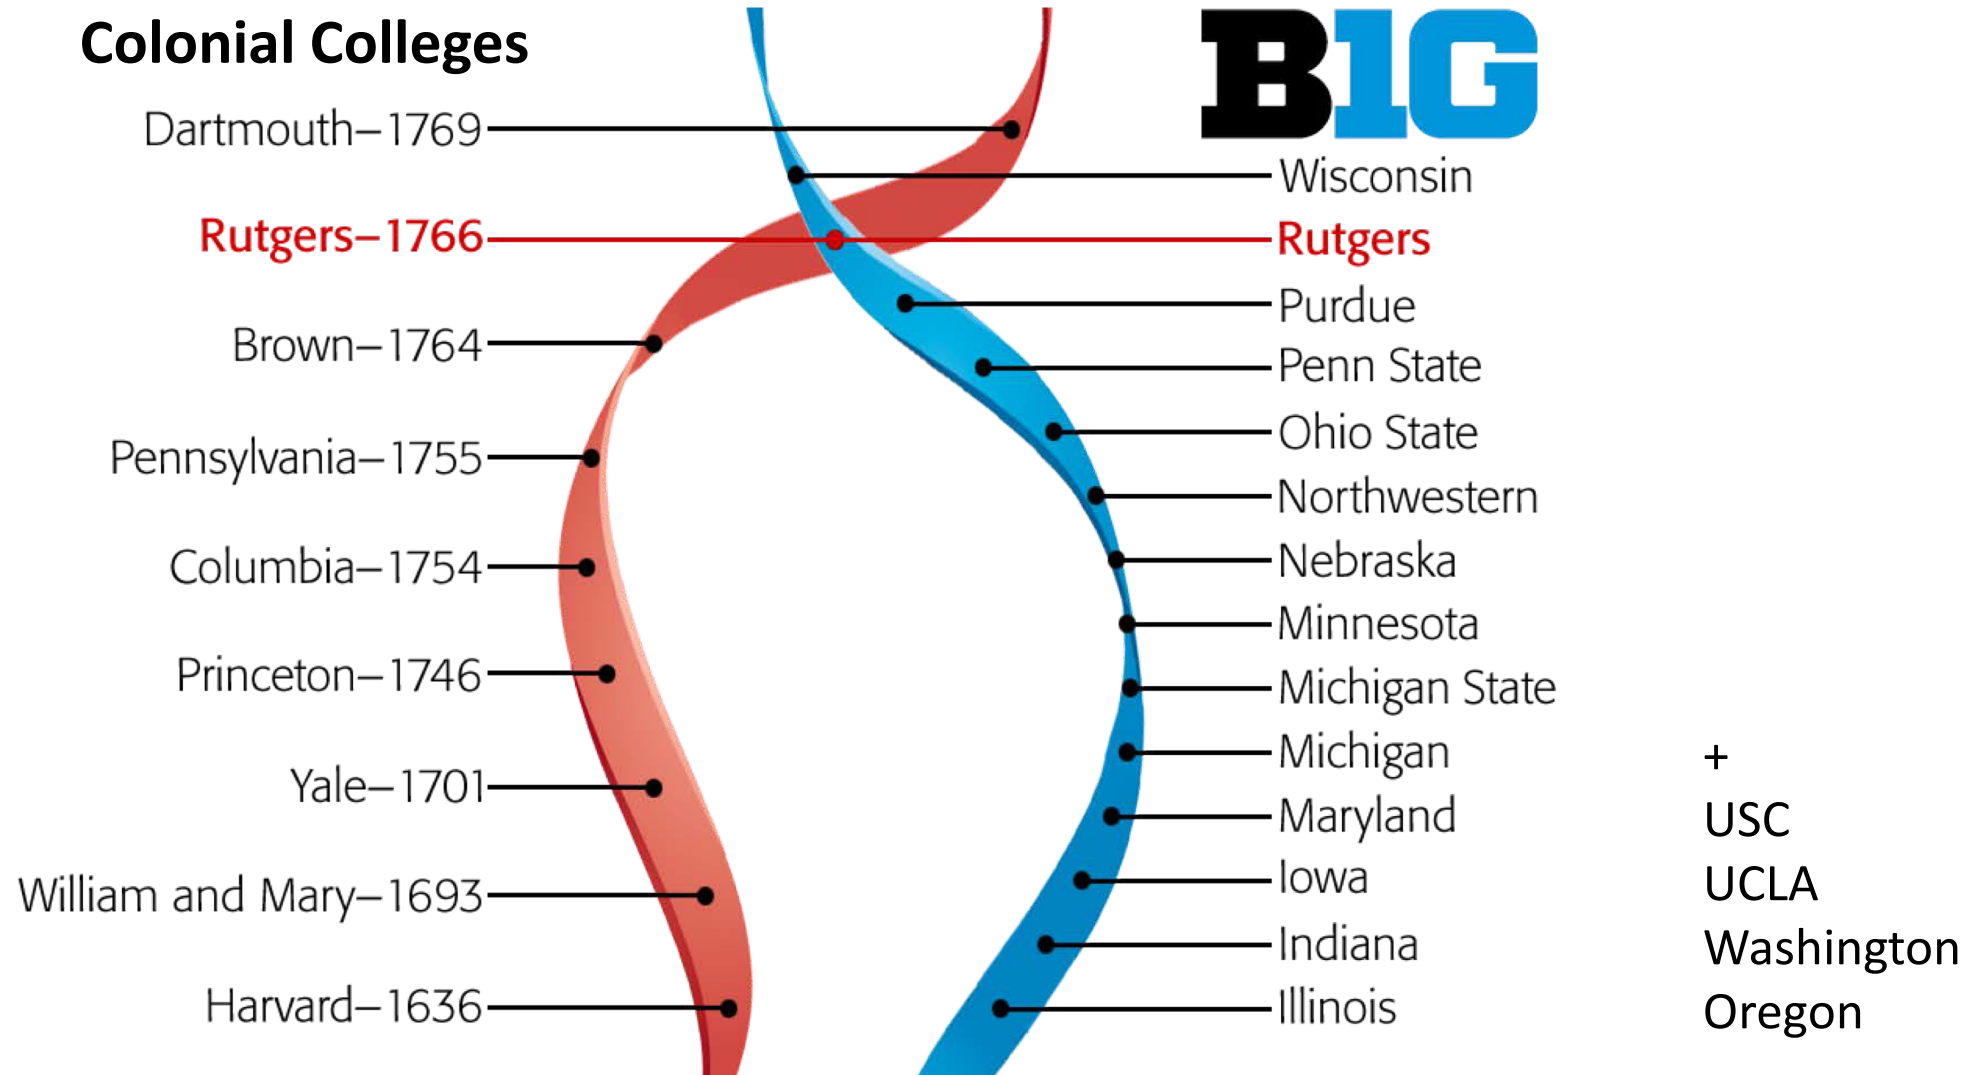

Revolutionary

Over 250 Years

- Eighth-oldest institution of higher learning in the United States
- Founded in 1766 as Queen's College, would later become Rutgers College, and now Rutgers–New Brunswick
- Rutgers–New Brunswick became New Jersey's land-grant institution in 1864
- 75 years ago Rutgers–Newark and Rutgers–Camden joined, and Rutgers officially became The State University of New Jersey
- Rutgers Health (formerly UMDNJ, then RBHS), re-integrated all health and medical related units with Rutgers University a decade ago

Historic Roots to Academic Powerhouse

Education

70,000
students

7,000
international students
from **165** countries

29
schools & colleges

150+
undergraduate
majors

400+
graduate
programs

Faculty Distinction

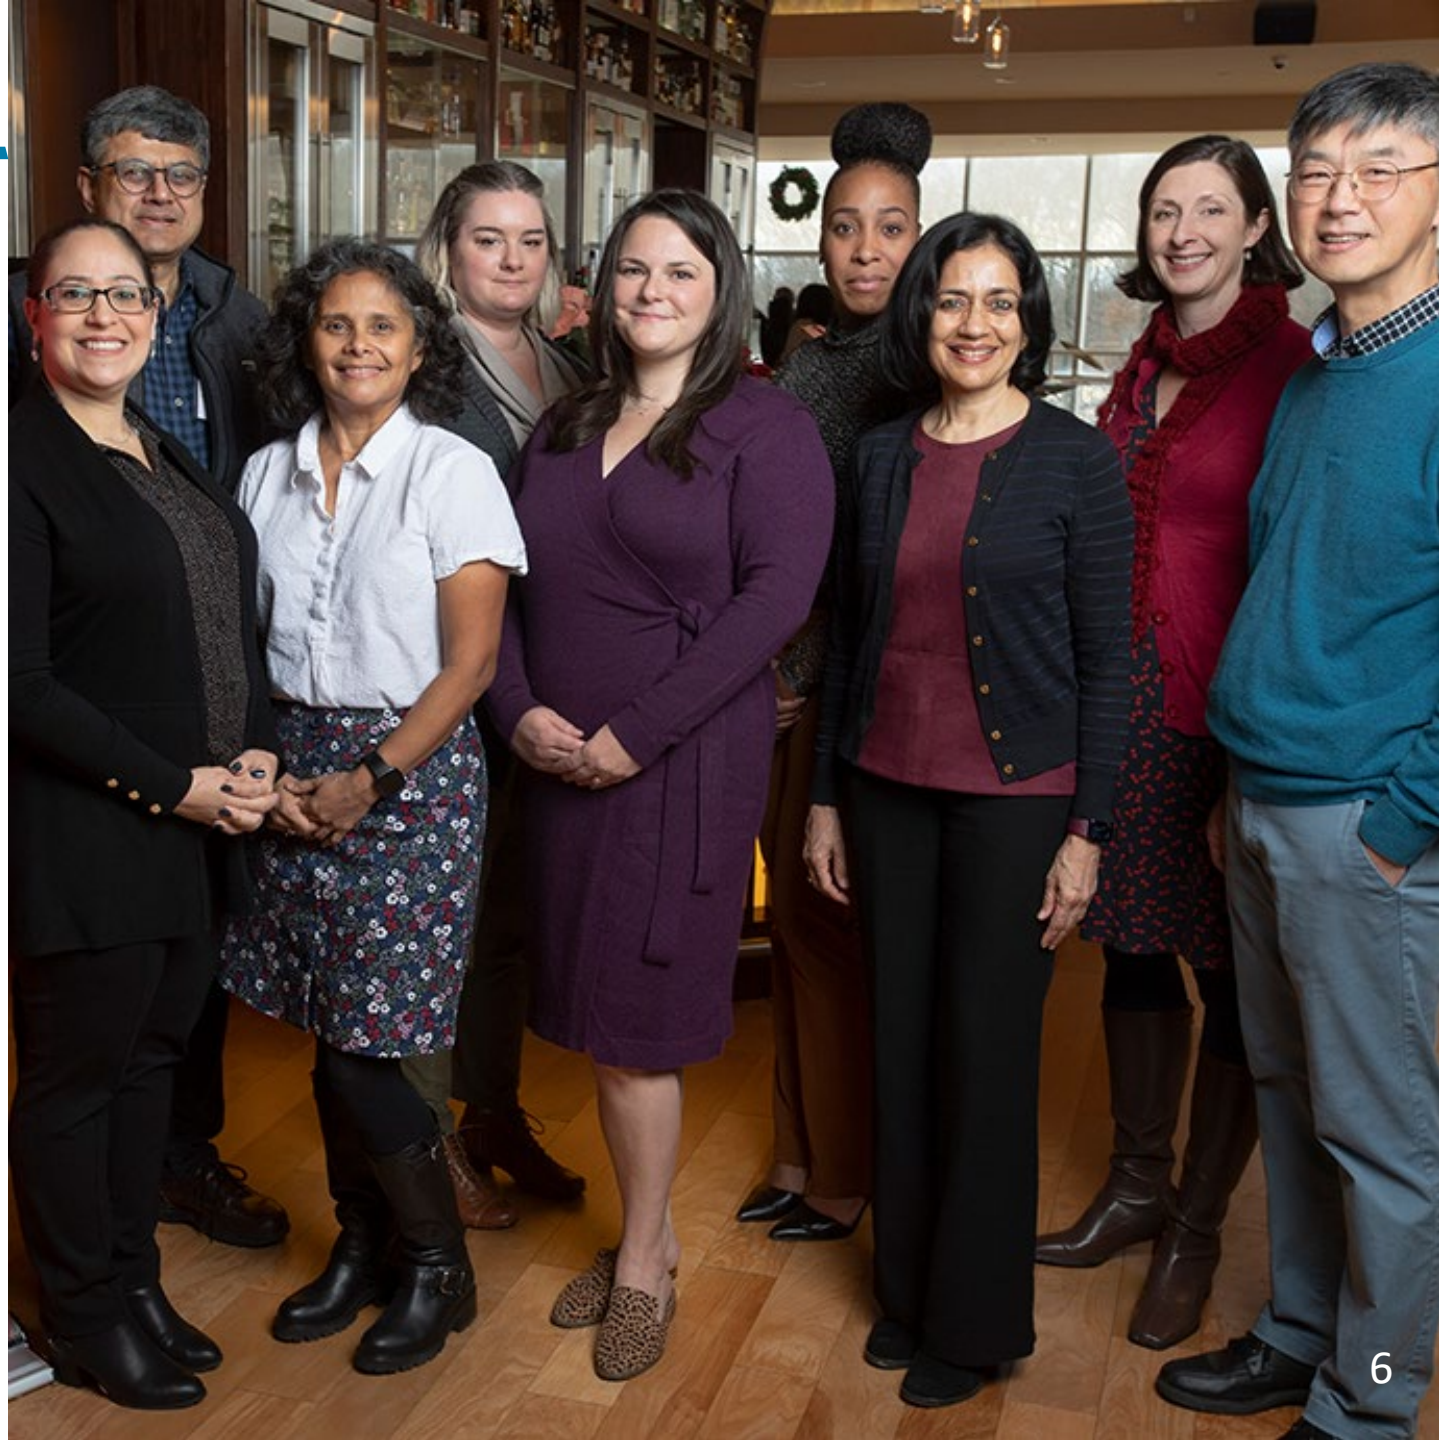

75 members of the National Academies

125+ Fellows of the American Association
Advancement of Science fellows

1,500 International scholars representing
100 countries

Faculty have earned:

- Nobel Prize
- Pulitzer Prize
- National Medal of Technology and Innovation
- National Medal of Science

Rutgers Means Research

Advancing Energy, Climate and Sustainability Research

- The Rutgers Climate and Energy Institute
- Earth System Science
- Human Dimensions of Climate Mitigation, Adaptation, and Resilience
- Renewable Energy, Technology and Energy Conservation
- Climate Change Communication and Environmental Humanities

Empowering Research Through Data Informatics and AI

- AI at Rutgers first developed in 1960s by Saul Amarel
- PDB – Protein Data Bank, RCSB - Research Collaboratory for Structural Bioinformatics
- Institute for Data, Research, and Innovation Science
- Cluster on Data Science and Artificial Intelligence
- Pioneering Health Informatics:
 - Clinical Data Warehouse
 - Patient Population Data
 - Biomedical Informatics
- AI informed cybersecurity initiatives across campus
- AI robotics to remove barriers to physical challenges of work
- Leading federal initiative on AI safety
- Critical AI

Transformational Advances in Life Sciences

- 
- Brain Health Institute
 - Center for Immunity and Inflammation
 - Human Genetics Institute
 - New Jersey Alliance for Clinical and Translational Medicine
 - Rutgers Cancer Institute
 - Rutgers Microbiome Program
 - W.M. Keck Center of Collaborative Neuroscience

HEALTH - INNOVATIONS

From the discovery of streptomycin to the fight against COVID and tracing genetic signals of schizophrenia, Rutgers is committed to improving people's health and lives.

Discovery of Streptomycin

The discovery of streptomycin at Rutgers revolutionized the practice of medicine, disease control, and the practice of public health.

Rutgers work with Tuberculosis

Rutgers New Jersey Medical School coordinates a worldwide effort to stop one of the deadliest infectious diseases from spreading.

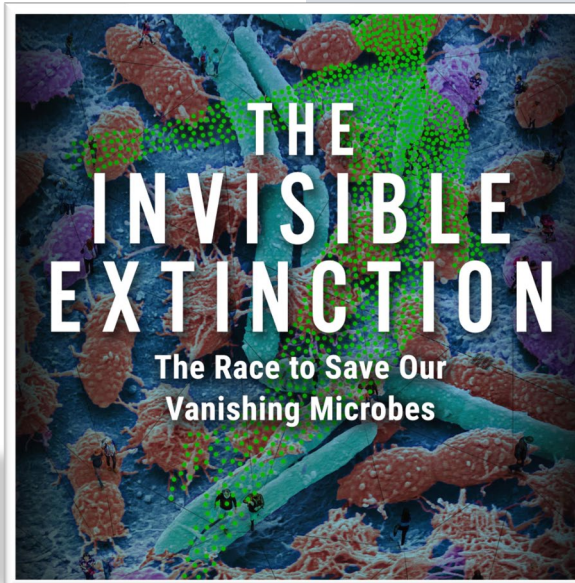

HEALTH - INNOVATIONS

From the discovery of streptomycin to the fight against COVID and tracing genetic signals of schizophrenia, Rutgers is committed to improving people's health and lives.

First Approved COVID Saliva Test

The pioneering test saved health care workers from exposure to infected patients and provided a high level of accuracy and sensitivity that is still the gold standard for coronavirus testing.

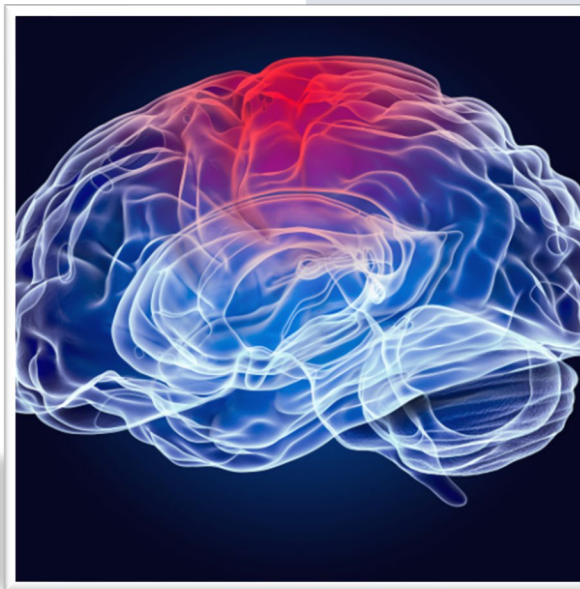

Saving the Human Microbiome

Rutgers microbiologists are endeavoring to save the vanishing microbes that are essential for human survival.

BRAIN HEALTH

The Rutgers Brain Health Institute is an internationally recognized as a basic, translational, and clinical research center.

**Landmark Study
Reveals Clearest
Genetic Signals Yet
for Schizophrenia**

**Rutgers Research
Bridging Gaps in
Alzheimer's Risk
Among South Asian
Populations**

CANCER RESEARCH

Rutgers Cancer Institute is one of an elite group of comprehensive cancer centers in the U.S. designated by the National Cancer Institute and the only one in the state of New Jersey.

CAR T-cell therapy is a form of immunotherapy offered at Rutgers Cancer Institute of New Jersey and Robert Wood Johnson University Hospital.

Rutgers Cancer Institute and RWJBarnabas Health Treats 200th CAR T-Cell Therapy Patient, Pioneering Cancer Treatment in New Jersey

RWJBarnabas Health, Rutgers Cancer Institute, Cooperman Barnabas Medical Center Awarded for Innovation in Cancer Care by Association of Cancer Care Centers

HELIX: Health and Life Science Exchange

- Rutgers Health Translational Research
- Rutgers School of Medicine
- New Jersey Innovation Hub
- Nokia Bell Labs new R&D facility
